

AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application:

LISTING OF CLAIMS:

1-14. (cancelled)

15. (currently amended) System and device for fixing a cloth and decorative elements to a table using a screw, comprising:

a mobile element;

a fixed element comprising i) a rectangular hollow shape shaped for attachment to an external edge of [[a]] the table and ii) a front part comprising two projections which block the mobile element when inserted inside the fixed element; and

the mobile element comprising a flat rectangular surface with a dimension to fit into an inner space of the fixed element so that upper and lower sides of the mobile element are blocked by the two projections upon insertion of [[a]] the cloth between the fixed element and the mobile element, wherein,

the fixed element further comprises a screw hole for lodging a head of [[a]] the screw and inner bulges on opposing sides of the hole for providing on an inside side of the fixed element a flat portion that, ~~between which bulges the head of the screw lodges, so that an inner side of the fixed element is~~

~~flat and~~ doesn't damage the cloth when the cloth is inserted between the fixed element and the mobile element.

16. (currently amended) System and device for fixing a cloth and decorative elements to a table, comprising:

a mobile element;

a fixed element comprising i) a rectangular hollow shape shaped for attachment to an external edge of ~~[[a]]~~ the table and ii) a front part comprising two projections which block the mobile element when inserted inside the fixed element; and

the mobile element comprising a flat rectangular surface with a dimension to fit into an inner space of the fixed element so that upper and lower sides of the mobile element are blocked by the two projections upon insertion of ~~[[a]]~~ the cloth between the fixed element and the mobile element, wherein,

the fixed element has an upper part that is longer than a corresponding lower part and comprises a further projection which fits into an upper notch of the mobile element.

17. (currently amended) System and device as claimed in claim ~~[[14]]~~ 24, wherein the fixed element comprises a screw hole (6) for receiving a screw to attach the fixed element to the table.

18. (currently amended) System and device as claimed in claim ~~[[13]]~~ 15, characterized in that the fixed element ~~may be fixed to the table by means of~~ further comprises an adhesive or biadhesive.

19. (currently amended) System and device ~~as claimed in claim 14~~ for fixing a cloth and decorative elements to a table, comprising:

a mobile element;

a fixed element comprising i) a rectangular hollow shape shaped for attachment to an external edge of the table and ii) a front part comprising two projections which block the mobile element when inserted inside the fixed element; and

the mobile element comprising a flat rectangular surface with a dimension to fit into an inner space of the fixed element so that upper and lower sides of the mobile element are blocked by the two projections upon insertion of the cloth between the fixed element and the mobile element, wherein,

the mobile element has, on the upper and lower part, two notches that correspond to the projections of the fixed element, the two notches defining an upper notch and a lower notch, wherein,

the fixed element device comprises two extensions located on a back side of the fixed element device,

the two extensions, by pressure, for fixing ~~fix~~ the fixed element to the external edge of the table, and

said back side being one of straight, hollow, and shaped as to suit the external edge of the table.

20. (currently amended) System and device as claimed in claim [[14]] 19, wherein

the fixed element ~~device~~ comprises a projection located on a back side of the fixed element ~~device~~,

the fixed element is ~~fixed~~ fixable to the table by the projection fitting into a notch on the external edge of the table.

21. (currently amended) System and device as claimed in claim [[14]] 19, in combination with the table and wherein the fixed element is applied over the entire length of the external edge of the table.

22. (previously presented) System and device as claimed in claim 21, characterized in that the notches of the mobile element have a rounded shape.

23. (currently amended) System and device as claimed in claim [[14]] 21, the fixed element and the mobile element have proportional sizes compared with a size of the edge of the table.

24. (currently amended) System and device ~~as claimed~~
~~in claim 14~~ for fixing a cloth and decorative elements to a
table, comprising:

a mobile element;

a fixed element comprising i) a rectangular hollow
shape shaped for attachment to an external edge of the table and
ii) a front part comprising two projections which block the
mobile element when inserted inside the fixed element; and

the mobile element comprising a flat rectangular
surface with a dimension to fit into an inner space of the fixed
element so that upper and lower sides of the mobile element are
blocked by the two projections upon insertion of the cloth
between the fixed element and the mobile element, wherein,

the mobile element has, on the upper and lower part,
two notches that correspond to the projections of the fixed
element, the two notches defining an upper notch and a lower
notch, further comprising elements to fix the cloth to sides of
the table, said elements to fix located on an external surface of
the mobile element.

25. (previously presented) System and device as claimed
in claim 15, further comprising elements to fix the cloth to
sides of the table, said elements to fix located on an external
surface of the mobile element.

26. (previously presented) System and device as claimed in claim 16, further comprising elements to fix the cloth to sides of the table, said elements to fix located on an external surface of the mobile element.
